(note1)

When adding a printer to [Printers & Scanners], the installed driver (PS driver or PCL driver) does not appear in the Use selection. If you want to add the installed driver, select [Use] > [Select Software ...]. And select the installed driver from the displayed list.

(note2)

Even if [App Store] is selected for [Allow apps downloaded from] in [Security & Privacy], a MacPPD can be installed from the DVD. This is caused by the performance of the OS.

(note3)

In OS security, the SNMP communication function cannot be used in the CUPS system to the PPD printing feature. As a result of this, the supply level will not be displayed.

macOS 26 Tahoe compatibility information

These statuses are for macOS 26.

Following way to use is not guaranteed.

- Use USB port of AirMac Extreme etc.
- Use shared printer of OS X function.
- Use remote Connection.
- If you are using the 180 ° rotation function, check "Reverse page orientation" in "Layout".

When you are using a Mac PC with an Apple M1/M2/M3/M4 chip, you may be asked to install Rosetta.
Follow the instruction and install it.

Product Name	Driver Type	Tahoe (26)
MPS4200mb	PCL	Support, but need Printer Driver Updater (PCL) for macOS 10.15 or later.
MPS4200mb	PS	Use the latest version posted on the Web.
MPS4200mb	Scanner (ICA)	Use the latest version posted on the Web.
MPS4700mb	PCL	Support, but need Printer Driver Updater (PCL) for macOS 10.15 or later.
MPS4700mb	PS	Use the latest version posted on the Web.
MPS4700mb	Scanner (ICA)	Use the latest version posted on the Web.
MPS5501b	PS	Support, but need Printer Driver Updater (PS) for macOS 10.15 or later.
MPS5502mb	PS	Use the latest version posted on the Web. (note1) (note2) (note3)

(note1)

When adding a printer to [Printers & Scanners], the installed driver (PS driver or PCL driver) does not appear in the Use selection. If you want to add the installed driver, select [Use] > [Select Software ...]. And select the installed driver from the displayed list.

(note2)

Even if [App Store] is selected for [Allow apps downloaded from] in [Security & Privacy], a MacPPD can be installed from the DVD. This is caused by the performance of the OS.

(note3)

In OS security, the SNMP communication function cannot be used in the CUPS system to the PPD printing feature. As a result of this, the supply level will not be displayed.

macOS 26 Tahoe utility compatibility

These statuses are for macOS 26 (Tahoe).

31-Mar-26
